EU:N TALOUSTILANNE JA JÄÄDYTETYT VENÄJÄN VARAT

* Jeffrey Sachs, taloustieteilijä, diplomaatti ja lukuisten hallitusten ja instituutioiden neuvonantaja maailmanlaajuisesti, varoittaa, että EU:n suunniteltu pääsy Venäjän omaisuuteen aiheuttaa vakavia häiriöitä. "Suunnitelma on laiton, holtiton ja tulee väistämättä maksamaan Euroopalle erittäin korkean hinnan, jos se toteutetaan. "Useat eurooppalaiset poliitikot, erityisesti EKP:n pääjohtaja Lagarde ja Euroclearin toimitusjohtaja Urbain, ovat ilmaisseet huolensa odotetuista markkinareaktioista", Jeffrey Sachs sanoo. *Liite 1*

Berliner Zeitung – 5. Dezember 2025 - Jeffrey Sachs warnt: Löst Merz heute Abend einen Finanzcrash aus?

Ökonomen sagen, der von der EU-geplante Zugriff auf russische Vermögen werde schwere Verwerfungen auslösen. Merz und von der Leyen wollen heute handeln.

Eigentlich müsste es Friedrich Merz besser wissen. Als ehemaliger Mitarbeiter des Finanzriesen Blackrock sollte er die Zusammenhänge an den internationalen Finanzmärkten kennen: Der Plan von

EU-Kommissionspräsidentin Ursula von der Leyen, zur Finanzierung der Ukraine auf 140 Milliarden Euro aus den eingefrorenen russischen Zentralbankvermögen zuzugreifen, könnte zu schweren Verwerfungen führen.

Jeffrey Sachs, Ökonom, Diplomat und Berater zahlreicher Regierungen und Institutionen in aller Welt, sagte der Berliner Zeitung: „Der Plan ist illegal, rücksichtslos und wird Europa im Falle seiner Umsetzung zwangsläufig sehr hohe Kosten verursachen. Das sagen auch führende europäische Finanzexperten. Europas finanzielle Glaubwürdigkeit wird schwer beschädigt, ganz zu schweigen von den Folgen russischer Klagen und Vergeltungsmaßnahmen. Darüber hinaus würde diese Aktion Europa tief spalten und die Beziehungen innerhalb der EU vergiften.“ ...

Substack/Scott Ritter – December 5, 2025 - A New Start for New START

Scott Ritter: American former United States Marine Corps intelligence officer, former United Nations Special Commission weapons inspector, author, and commentator. Ritter was a junior military analyst during Operation Desert Storm.

New START expires on February 5, 2026. It cannot be extended. Negotiating a new treaty seems impossible. The best bet might simply to recycle the treaty in its entirety, and put on a new date.

... There appears to be only one path forward that could see the New START treaty continue to serve as the foundational agreement upon which future US-Russian arms control negotiations could be conducted—simply put, the treaty would need to be embraced as it, with no amendments or modifications, and endorsed by both Trump and Putin as a new treaty. Given the fact that both the US Senate and Russian Duma had previously ratified the New START treaty, it is not a stretch of the imagination to believe that rapid ratification of a re-born New START treaty could be accomplished by both the US and Russia.

By breathing new life into a 15-year old treaty, Russia and the US would engender a sense of strategic stability which could anchor the necessary negotiations about new strategic weapons, INF missiles, and ABM defenses that would need to take place. Moreover, given the fact that China has just published a new arms control white paper which puts the onus on both the US and Russia to enter into serious talks about significantly cutting the size of their respective nuclear arsenals before China could see fit to join into any multilateral arms control discussions, a revival of New START would serve the purpose of preventing the kind of nuclear arms race which would make such negotiations impossible.

Drop Site News – December 3, 2025 - "A Second West Bank": Israeli Military Raids Escalate in Occupied Syrian Border Villages

Israeli forces are entrenching even further in Syria as Benjamin Netanyahu says he wants a demilitarized "buffer zone" stretching to Damascus.

QUNEITRA, SYRIA—In what has become a regular occurrence in southwest Syria, Israeli tanks and troops stormed the Quneitra countryside on Monday, taking up positions in the village of Saida Al-Hanout. As drones flew overhead, Israeli military units set up a temporary checkpoint and searched civilians before eventually withdrawing.

Over the past year, Israeli forces have established nine military posts in southern Syria; constructed military installations less than one kilometer from villages; demolished at least 12 buildings in al-Hamidiya; razed over 45 hectares of the Jubata al-Khashab forest; and seized thousands of dunams of agricultural land, cutting off access to farmers' livelihoods. Local officials told Drop Site News that, in total, Israel has illegally seized between 600 and 800 square kilometers of southern Syrian territory through more than 200 incursions. ...

SIPRI – December 1, 2025 - Top 100 arms producers see combined revenues surge as states rush to modernize and expand arsenals

Revenues from sales of arms and military services by the 100 largest arms-producing companies rose by 5.9 per cent in 2024, reaching a record \$679 billion, according to new data released today by the Stockholm International Peace Research Institute (SIPRI), available at www.sipri.org.

Global arms revenues rose sharply in 2024, as demand was boosted by the wars in Ukraine and Gaza, global and regional geopolitical tensions, and ever-higher military expenditure. For the first time since 2018, all of the five largest arms companies increased their arms revenues.

Although the bulk of the global rise was due to companies based in Europe and the United States, there were year-on-year increases in all of the world regions featured in the Top 100. The only exception was Asia and Oceania, where issues within the Chinese arms industry drove down the regional total.

Newsweek - December 1, 2025 - Russia Hits Back at NATO Plans To Get 'More Aggressive'

Russia has hit back at comments from NATO's top military commander after he suggested the alliance could launch "*pre-emptive*" strikes against Moscow, in the context of tactics like cyberattacks or sabotage.

Admiral Giuseppe Cavo Dragone, the chair of NATO's military committee, told the Financial Times the alliance was mulling over "*being more aggressive or being proactive instead of reactive.*"

A "*pre-emptive*" move from NATO could be deemed "*defensive*" but would be a step away from how the alliance would typically operate, the Italian admiral added.

Dragone's remarks are "*an extremely irresponsible step, indicating the readiness of the alliance to continue to move toward escalation,*" Maria Zakharova, a spokesperson for Moscow's Foreign Ministry, said in comments reported by state media on Monday. ...

Militarisation of the Arctic

- DCAs enable permanent US military presence and infrastructure development north of the Arctic Circle, turning the region into a forward operating zone.
- Facilities in Finland, Norway, Sweden, Greenland and Denmark give NATO and US forces proximity to Russia's Northern Fleet and nuclear bases.
- Increased military exercises, enhanced surveillance, dual-use infrastructure and rapid-response capabilities have intensified strategic competition and risks of escalation.
- Militarisation raises environmental and Indigenous rights concerns, overshadowing climate and social issues.

Nuclear weapons policy

- DCAs do not explicitly allow nor forbid nuclear weapons; Finnish and Swedish laws indirectly restrict nuclear weapons, while Danish and Norwegian policies forbid them only in peacetime.
- US exclusive control over prepositioned materiel, limits host countries' influence over potential nuclear deployments.
- While deployment of nuclear weapons in Nordic countries is unlikely, NATO nuclear burden-sharing and exercises involving nuclear scenarios continue.
- Preparations for wartime dispersal of nuclear weapons raise concerns about future deployment possibilities and escalation. ...

The Palestine Chronicle – November 29, 2025 - General Strike: Italy Stops to Oppose War, Austerity, and Complicity with Israel

A day of blockades and marches put the budget, wages, militarization, and Italy's role in the massacre in Gaza at the center of the national debate.

The nationwide general strike that spread across Italy came to an end on Friday evening, marked by demonstrations, marches, and sit-ins in dozens of cities. The strike had been called by USB, Cobas, and other grassroots labor unions, reviving the slogan "Blocchiamo Tutto" ("Shut Everything Down"), the same one that characterized September's protests against Israel's war on Gaza and had halted ports, transportation, and logistical hubs across the country. The goal of the mobilization was to contest the Budget Law and the government's decision to further increase military spending while cutting or freezing public investment in healthcare, education, universities, transport, and other essential public services.

YouTube – November 23, 2025 - The American Empire Is Crumbling Before Your Eyes.. | Prof. Jeff Sachs

One thing to say right at the outset is that there is apparently a debate going on inside the US security state about the US military and security doctrine. So we are going to learn something in the coming days and weeks more than we know now. There are lots of reports about a new national defence strategy to be unveiled. Some reports say that it calls for a retrenchment of American strategy. That would be interesting. That is actually necessary from the US point of view. The US is an overstretched and not very capable global empire. It has military bases in an estimated 80 countries Something around 750 to 800 overseas military bases ... this is an overstretched empire ...

Ukraine is a battle ground because US aimed to surround Russia with military bases and weapons systems through the enlargement of the US-NATO military alliance ...

YouTube/Dialogue Works – November 22, 2025 – Craig Mokhiber: West Asia: The Endless War They Don't Want You To Understand

Craig Gerard Mokhiber is an American former United Nations (UN) human rights official and a specialist in international human rights law.

...What has happened with the UN resolution (Gaza - Vote in UN November 17, 2025) that was suggested by the United States and Russia and China have

decided not to veto the resolution. What's your take of the behaviour of China and Russia?

Well it is hugely disappointing. This resolution was in a word an atrocity. This is a resolution adopted in violation of international law. ... It was not in the Security Councils power to adopt many of the terms of this resolution. It was a proposal drafted by Donald Trump and his crownies ... and adopted in total by all fifteen members the Security Council, 13 of which voted in favour and as you say two of which, permanent members of the council with veto power, declined to use their vetoes and merely abstained. ...

Now why? I am told by diplomats it was the most extreme case of pressure deployed by Washington against member states to cajole them into supporting this resolution or at least not blocking it. ... But then there were other factors. What the Americans did effectively was to threaten, as I said, to threaten that they would unleash the dogs of genocide completely again. That they would allow Israel with full US support to continue its assault on the Palestinian people.

LIBERIAMOCI DALLA GUERRA ASSOCIAZIONE PER UN MONDO SENZA GUERRE – November 21, 2025 - Injustice is done

The United Nations Security Council has passed a resolution adopting the United States Peace Plan for Gaza, providing a legal mandate to the Trump Administration. The Plan provides for the intervention of an "International Stabilization Force," composed of 20,000 soldiers, to govern Gaza. It also provides for the creation of a "Peace Council" to oversee the "Peace Plan", without, however, clarifying its composition. It is an important diplomatic victory for the Trump Administration. The Resolution was approved with 13 votes in favor and zero against. Russia and China, that they could have vetoed, they abstained, clearly influenced by support for the Resolution from a number of Arab and Muslim nations, currently in the Security Council, including four – Egypt, Indonesia, Saudi Arabia and the United Arab Emirates – which are part of BRICS. Russia and China, in justifying the abstention, they criticized the Plan, especially because it does not respect the "two states" principle, two peoples" ignoring Palestinian sovereignty. ...

FRANCE24 – November 20, 2025 - France's top general under fire after saying country must be 'prepared to lose children'

Chief of the Defence Staff General Fabien Mandon has been roundly condemned in France for telling local mayors that the country needed to be prepared to accept the death of its children if it was going to deter further Russian aggression following Moscow's invasion of Ukraine.

France's top general on Thursday faced a backlash across the political spectrum after warning that the country must be ready to "lose its children" against the background of the threat posed by Russia.

Chief of the Defence Staff General Fabien Mandon said in a speech to local mayors on Tuesday that, while France has the economic and demographic power to defeat Moscow, it lacked the "spirit" in society to stand up to the menace. ...

"We have all the knowledge, all the economic and demographic strength to deter the Moscow regime from trying its luck by going further," said Mandon.

"What we lack, and this is where you have a major role to play, is the strength of spirit to accept suffering in order to protect who we are," he told the mayors.
