## **YouTube/Times Now World - January 27, 2026 - 'GREEDY GLOBALIST ELITES': Russia Goes Off At UNSC, Calls Out UN Chief Guterres | Times Now World**

Russia's UN Ambassador Vassily Nebenzia accused Western powers on Tuesday of hollowing out international law, saying the United Nations Charter was being selectively applied to justify sanctions, military expansion and interference in sovereign states. Speaking at a UN Security Council open debate on the rule of law, Nebenzia said NATO's expansion, economic sanctions and the seizure of sovereign assets amounted to a shift from law to force, warning that such practices risk pushing the world into a dystopian future. He urged the UN to regain independence and uphold sovereignty, cooperation and equality among states, cautioning that continued erosion of international law would have global consequences.

*"Modern international law based on the UN charter in its entirety is the heritage of humanity, the protection of which is one of the main tasks of our organisation. And the UN charter is not a menu from which you can choose provisions that suit our former western partners geopolitically. It is a complete document in its entirety, totality and interrelations. If you refer to one principle of the charter, do not forget to quote others. ..."*

**YouTube/Glenn Diesen – January 22, 2026 - Jeffrey Sachs: Davos - US Empire Unhinged & Europe Subordinated**

*Prof. Jeffrey Sachs discusses how Davos Reveals a Fractured West: U.S. Empire is Unhinged, Canada Pushes Back, Europe Falls in Line*

... What I meant in saying to the European Parliament you should understand what the United States is, I meant that they should understand that the United State is an imperial power. It acts greasingly and brutally and for about twenty years almost no European leader said a word against that predatory behaviour by the United States as the US invaded one country after another. As it overthrew governments, as it played recklessly in Ukraine. The Europeans were quiet. They may even have liked it.

As the US was complicit in Israel's disastrous wars across Africa and the Middle East, as the United States went to war in Iraq, went to war in Libya, overthrew or assigned the CIA to overthrow the government of Syria, played a very deep and destructive role in the overthrow of the Ukrainian president Viktor Yanukovich in February 2014. The European leaders just were silent.

When the United States bombed Iran last June the European leaders said oh, Iran you should exercise restraint. They did not tell the United States to exercise restraint.

When the United States kidnapped the president of Venezuela the European leaders were fine, he is a bad guy.

But then when the United States said we want Greenland, oh no, that is unfair. What about international law? You have to respect things and the New York Times discovered that America has imperial tendencies. It had not mentioned it for several decades actually. But it discovered it because now we were talking about a European country in a European territory.

So there is a lot of naivety and hypocrisy in everything that's been going on in recent times.

To put my position very clear, I think the United States is toughish, imperialistic, reckless, and that the US has left a large swathe of the world in misery.

And Europe has been mostly compliant or complicit in a lot of that outside Europe. ...

## **Drop Site News – January 20, 2026 - Israel Is Preparing Land in Rafah to Corral Palestinians into an Area Under Full Military Occupation**

*Satellite images analyzed by Forensic Architecture show Israel razing land, compacting the ground, and clearing rubble in Rafah in a way that is not visible anywhere else east of the yellow line.*

Israel is razing a strategic area of Rafah in southern Gaza, compacting the ground, and clearing rubble in a way that suggests the land is being prepared for the construction of new residential infrastructure, according to new research by Forensic Architecture. The findings, which are based on an analysis of satellite imagery, suggest that Israel is beginning to build infrastructure which may be used to house Palestinians and effectively contain them in an area under full Israeli military control.

Since the so-called ceasefire went into effect on October 10, Israel has engaged in widespread destruction of buildings and infrastructure across the more than 53% of Gaza that it occupies east of the yellow line. However, this pattern of Israeli activity—razing the land, compacting the ground, and clearing the rubble—is not visible at this scale anywhere else east of the yellow line. The activity is centered in an area around 1 square kilometer in Rafah at the intersection of the two military corridors. ...
