TEKOÄLY, KOULULAKOT JA NATO
Nro 126 - 9.10.2026

Arvoisa vastaanottaja!

Maailma on ajautumassa kohti eräänlaista anarkiaa. Aseistariisuntasopimukset on hylätty – sen sijaan käynnissä on massiivinen aseistautuminen, johon kuuluu myös ydinaseet. Näistä valtavirran mediassa ei puhuta. Rahaa riittää sotiin ja niihin varustautumiseen, mutta ei hyvinvointiin eikä sosiaaliseen oikeudenmukaisuuteen. Tämä ei luo turvallisuutta. Tämä ajaa ihimisiä kaduille.

Alla olevissa linkeissä on paljon tietoa viimeaikaisista tapahtumista.

CNN – October 8, 2026 - US has lost or sustained damage to 81 military aircraft worth up to $3.3 billion in Iran war, congressional report says

…The number includes both airplanes and helicopters as well as drones, with the MQ-9 Reaper drone – used for intelligence, surveillance and reconnaissance, close air support and combat search and rescue – accounting for more than half of the losses.

But also on the list are some of the Pentagon's most-prized assets, including an F-35A fighter jet and an E-3 Sentry, the four-engine jet with a large radar dome atop the fuselage used for target tracking and airspace management.

The total cost of the aircraft lost is between $1.9 billion and $3.3 billion, depending on the Defense Department's plans for replacements, the report said, citing figures from the Congressional Budget Office. …

The Guardian – October 6, 2026 - 'Pull the plug': protesters resort to direct action against AI firms

Campaign groups report surge in membership after a spate of AI safety alerts and apocalyptic warnings

In a bar below Waterloo Bridge, a cell of a fast-growing anti-AI protest movement met last week to plot their latest move: disrupting a tech industry dinner being addressed by a senior executive from the chip maker Nvidia. …

As darkness fell they crossed the Thames to the Claremont hotel where Emma filmed while two others unfurled a banner in a function room, shouting "*Pull the plug on Nvidia"* and "*Pull the plug on Palantir"*. Hundreds of protesters also staged a rally in front of Palantir's London HQ last Thursday.

"We did not consent to the kind of build-out that you are planning here," the activists yelled as they were wrestled out of the door. They edited a video clip – "activist disrupts elite AI network dinner – Nvidia edition" – and uploaded it to Instagram. It was a small gesture, but they had made their stand. …

EXPRESSEN - 6 okt 2026 - Svenska fackförbund i upprop mot Palantir

I ett stort upprop uppmanar över 100 organisationer Europa att helt sluta använda den kontroversiella mjukvaran.

YouTube/Donald Smith – October 4, 2026 - NATO, Ukraine, and the Price Europe Pays

Europe pays, the U.S. gains. Successive American political leaders expanded NATO right up to Russia's borders, knowing full well that Russia would regard such expansion as a threat. Would the U.S. allow Russia to expand a hostile military alliance into Canada? In short, the U.S. intentionally provoked the war in Ukraine, to weaken Russia, to wean Europe from Russian energy, and to enrich American arms and energy corporations. The Guardian – October 2, 2026 - Fires, fury and hundreds of arrests as France gripped by student protests

Government struggling to deal with worst crisis in months after being taken by surprise by massive demonstrations

"We hope this grows into a massive youth protest movement," said the final year baccalaureate student at Paris's Lycée Voltaire, who did not want her real name published. She was on her second day of blocking the school entrance along with hundreds of others, ensuring all lessons were cancelled. "We just want to be listened to by the government. We'd rather stand here doing this than have to learn in poor conditions. It's the only way to make ourselves heard."

"School is a right, not a privilege," read a cardboard sign as Sophia listed the grievances of teenagers across France: a lack of state investment in education, overcrowded classes of up to 40 children in crumbling buildings, poor teacher pay, staff absences and an unequal system in which social background determined success. Campaign for Nuclear Disarmament – CND – October 2, 2026 - US weapons confirmed in space

Dave Webb, Yorkshire CND Chair, outlines the context of the revelation that the US has deployed weapons in space.

Confirming what many peace campaigners have suspected for a long time, it has now been revealed that the US has deployed weapons in space.

While the US has been exploring anti-satellite (ASAT) systems since the Soviet Union launched Sputnik in 1957, US Secretary of the Air Force Troy Meink disclosed last month that these could be kinetic (hit to kill projectiles) or non-kinetic (including laser, electronic warfare and signal jamming weapons). The truth is we don't know what type of weapons there are in space, how many there are, or how long they have been there.
It is even possible that the US has stationed more than one type of weapon in spaceon. Non-kinetic weapons – such as lasers and electronic warfare weapons – could damage electronic equipment, and jamming systems could disrupt communications between satellites and with the ground. …

The Guardian – October 1, 2026 - Forget 'superintelligence': error-prone AI nearly sparked world war three this month

The risks of AI aren't what we think they are, as a recent security incident between China and the United States reveals

According to him, OpenAI and Anthropic are "racing straight towards self-improving superintelligence and gambling with our lives". Osservatorio contro la militarizzazione nelle scuole e università - October 1, 2026 - Report on the mobilizations against the NATO civil-military exercise in Hamburg

Every few hours, a black and dark-green tanker truck—one that certainly doesn't blend into the urban backdrop—moves through the traffic. There is no telling what it is carrying—it is likely empty, given the circumstances—but the symbols it bears are clear. Two are technical: a flame and a stylized dead fish beneath a stylized dead tree indicate the presence of several thousand liters of a substance that is flammable and highly hazardous to the environment. But the third symbol is even more dangerous: the "Iron Cross" of the Bundeswehr, the German Armed Forces.

We are in Hamburg, where "Red Storm Charlie"—a city-wide NATO civil-military exercise—is taking place from September 24 to 26. Interpreting this third image is more difficult, as the cross's symmetrical design dates back centuries. It traces an unbroken line all the way back to 1191 in Jerusalem, where it first appeared as the emblem of the Knights of the Teutonic Order during the Third "Holy War." It makes no difference that there have been Nazi-fascism, two world wars, a genocide, colonies, and holy—or just, or defensive—wars. Despite everything, the German Armed Forces still retain the cross, proudly emblazoning their vehicles with the slogan: "Wir. Dienen. Deutschland." ("We. Serve. Germany.")…

Yahoo News – October 1, 2026 - Analysis: Trump's TIME interview shows a president consumed by his own news coverage

President Donald Trump's new interview with TIME magazine begins and ends with his complaints about the media, reaffirming how consumed he is by his own news coverage.
Even when asked about Iran or the Senate, he circled back to his feelings about the press.

"You haven't asked me one f**king positive question," Trump said toward the end of the interview with Eric Cortellessa and Sam Jacobs.

The entire interview was remarkably emotional. "Well, I hope I get a decent story," Trump concluded. "I don't think — you know, it's hard to get a good story. Every question's a hit. I don't know what the hell's wrong."

Trump's strong reactions may relate to his recent banning of CNN, MS NOW and Politico from the White House — a rash action that was stopped by a federal judge last week. …

Trump gave his usual answer, differentiating between real and "fake" news, with the implication being that he should have the power to decide what's real and what's not. …

UNITED24 MEDIA - September 28, 2026 - Germany Concludes "Red Storm Charlie" Civil-Military Defense Exercise in Hamburg

Germany's Bundeswehr, civil emergency services, and private corporations have concluded "Red Storm Charlie," a major three-day joint defense exercise in Hamburg involving 1,700 participants, German public broadcaster NDR reported on September 26.

The large-scale exercise simulated a range of hybrid threat scenarios across the city and port infrastructure, including neutralizing explosive-laden drones over port terminals, responding to chemical spills, and managing train sabotage, according to NDR. …

On the night of September 24, a military convoy of 70 vehicles moved through the city under police escort.

September 26 drills, on the other hand, focused on mass-casualty evacuation using underground field emergency rooms and helicopter airlifts to the University Medical Center Hamburg-Eppendorf.

Civil-military cooperation expanded significantly for this third iteration of the annual drill, with civilian partners increasing from 12 last year to 60, NDR noted. …

GERMAN-FOREIGN-POLICY.com – September 28, 2026 - Military cooperation with Israel

Bundeswehr strengthens cooperation with Israel Defence Forces (IDF). Police and cybersecurity counterparts will also deepen collaboration, while Israel's wars for dominance in the Middle East escalate.

TEL AVIV/BERLIN (our own report) – Germany is systematically stepping up military, police and cybersecurity cooperation with Israel. The agreements formally concluded at the start of the year are now being implemented. The 'Cyber and Security Pact', signed in January, provides for closer cooperation between the respective police agencies and the establishment of a 'Cyberdome' in Germany. Berlin hopes its security cooperation with Israel will offer "practice-based know-how from a country with a high frequency of military operations." Another agreement, concluded in February, enables greatly intensified military cooperation designed to make the Bundeswehr "war-ready" in practice. The idea is for Israeli ground forces to pass on to the German army the capabilities and experience gained in Israel's past and current wars. With their "unrivalled expertise in the field of ground operations", the Israel Defence Forces (IDF) are helping the Bundeswehr "adapt to an increasingly volatile global environment". These steps to strengthen security collaboration with Israel are taking place against the backdrop of the ongoing wars for dominance in the Middle East. …

Economist and geopolitical commentator Jeffrey Sachs discusses what he describes as the weaponisation of the US dollar and the broader history of American interventionism. In the discussion, Sachs refers to Donald Trump and what he calls one of the president's clearest statements on the issue, before turning to US strategy towards Ukraine and the development of military capabilities and interoperability during Trump's first term. The discussion places the dollar, Ukraine and US foreign policy within a broader debate over America's use of economic and military power.

" I'm in favour of alternatives to the US dollar mostly not on technical monetary reasons, but on the fact that US has weaponized the dollar. …"

CNN – September 18, 2026 - Exclusive: US military had close call after using AI for false intelligence report, sources say

The intelligence report, circulated across the US military this spring in the midst of the war with Iran, immediately set off alarm bells: A Chinese ship in the Middle East was transporting components of a nuclear weapons program.

The US military swung into action with plans to intercept the vessel, according to four sources familiar with the episode. According to two of the sources, armed members of the US military were preparing to board the ship. Military planes were in the air, one of those sources and another source familiar with the incident said.

It was only just before the planned operation that officials dug deeper into the report put together by a special operations command analyst and found it had been generated with the help of artificial intelligence (AI) — and that a chatbot the analyst had used inaccurately identified the material the ship was carrying. CNN was not able to learn what the misidentified cargo was.

The report, according to one of the sources, was "entirely false." But it also "almost started a war," the source said. …

World BEYOND War – September 18, 2026 - Bases Without Names: How Governments Rebrand the U.S. Military Presence

From "Forces of allied and friendly nations" in Jordan to "agreed locations" in the Philippines and a "rotational presence" in Australia, governments use legal and diplomatic language that avoids describing facilities hosting U.S. forces as military bases. Yet changing the terminology does not change these sites' military function. …

Across Asia, Europe and the Middle East, governments use an expanding vocabulary to describe sites that accommodate U.S. troops, aircraft, weapons, equipment and logistical systems. They speak of "agreed locations", "joint-use facilities", "rotational deployments", "defense cooperation", "host-nation support" and, most revealingly, "places, not bases". …

YouTube/Glenn Diesen – September 17, 2026 - Yanis Varoufakis: EU Is Finished & China Can Now Pull the Plug on the U.S. Economy

Yanis Varoufakis is an economist, the former Finance Minister of Greece, and the author of numerous bestselling books. Varoufakis discusses how the EU is a cartel designed by the U.S. that is no longer fit for purpose. The German economic locomotive has broken down; the EU no longer has an economic model, its foreign policy is consumed by war, and it has already become a technological colony. Varoufakis also argues that China can now pull the plug on the U.S. economy if it chooses to do so.

Global Research – August 5, 2026 - NATO to Double or Triple US Nuclear Sharing Warheads, Normalize a Confrontation Which Could Lead to Thermonuclear War

Deploy them in Finland, Poland and Lithuania

NATO is no longer even bothering to hide that it wants to expand its nuclear footprint on the "old continent". Namely, the most aggressive racketeering cartel

in recorded history is sliding into an increasingly dangerous nuclear posture, with the shift being sold as "routine deterrence". In reality, the change is a deliberate widening of escalation options aimed at upending Russia.

Combined with France's preparation of a base for nuclear-capable "Rafale" fighter jets, this process is effectively a (geo)political and military masterclass in "normalizing" a confrontation that could bring about thermonuclear annihilation of humanity. With the new "Eastern Front" closer to a hair-trigger condition than ever before, this sort of escalation is virtually guaranteed to deliver what Western warmongering oligarchies have wanted for centuries – an all-out war with Russia.

Firstly, it should be understood that even from a theoretical point of view, this is not static deterrence, but an active preparation for offensive nuclear warfare.

New infrastructure, upgraded airbases, greater readiness for nuclear-capable assets, massive expansion of delivery options and systems, etc., none of which are "administrative measures" or *"seamless red tape".* …

YouTube/Neutrality Studies – March 29, 2025 - How NATO Is Breaking It's Own Treaty (and more): A Rogue War Machine Since 1999.

NATO's worst enemy is NATO itself. The impunity with which this rogue war machine is breaking not only International Law but also its very own charter is breath-taking. It is hard to believe but as so often, the most outrageous and extensive crimes are hidden in plain sight. NATO parades its founding charter on its homepage, where article 6 clearly states the area covered by the treat. (https://www.nato.int/cps/ua/natohq/of...) Yet, on the same homepage, the organisation also proudly presents all corners of the world in which it is (or was) active—way beyond what the charter provides for.https://www.youtube.com/watch?v=K8q-curesvY
